2. The following is an examiner's statement of reasons for allowance:

Prior art was not relied upon to reject claims 1-31 because the prior art fails to teach and/or make obvious the following:

Claims 1-22: Providing a chemical agent detector comprising: a plurality of SAW sensor driver boards mounted on a manifold; and a plurality of SAW sensors, each one mounted on a separate sensor driver board such that they are in contact with an ambient air sample drawn within the manifold, each SAW sensor and sensor driver board generating its own continuous RF signal which emits a frequency shift of the continuous RF signal if the particular chemical agent to which the SAW sensor has an affinity for detecting is loaded upon the SAW sensor of a particular SAW sensor driver board by the sample of ambient air in combination with all of the remaining limitations of the base claim.

Claims 23-31: Providing a chemical agent detector comprising: a plurality of SAW sensor driver boards mounted on a manifold, each SAW sensor driver board having its own SAW sensor mounted thereon such that all SAW sensors come into contact with ambient air drawn into the manifold by a pump, each SAW sensor driver board generating its own continuous RF signal which emits a frequency shift of the continuous RF signal if the particular chemical agent to which the SAW sensor has an affinity for detecting is loaded upon the SAW sensor of a particular SAW sensor driver board by the sample of ambient air in combination with all of the remaining limitations of the base claim.
